VIVEK PADELKAR

Mumbai, India | +91-7666918811 | vivek.padelkar@gmail.com | linkedin.com/in/vivekpadelkar

PROFESSIONAL SUMMARY

Senior Backend Engineer with 10+ years in software development, including 8+ years building scalable microservices and RESTful APIs in Node.js, Express.js, and TypeScript. Track record of measurable performance gains: 45% latency reduction, 40% lower DB load, and 60% faster deployments through Redis caching, PostgreSQL tuning, and CI/CD automation. Leads a team of 3 engineers in insurance, with hands-on delivery of compliance-critical data pipelines (Aadhaar PII masking, Triple DES encryption) and legacy database migrations (MSSQL to PostgreSQL). Daily user of AI-assisted development tooling (Claude Code, GitHub Copilot, AWS Kiro, MCP) to accelerate delivery.

CORE SKILLS

Languages & Frameworks: Node.js, Express.js, TypeScript, JavaScript, Python, ReactJS, HTML5, CSS3

Architecture: Microservices, RESTful API Design, System Design, Dependency Injection, Message Queues (AWS SQS)

Databases & Caching: PostgreSQL (query & index optimization), MySQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, API Gateway, SQS), Docker, CI/CD (Git, Jenkins)

Testing & Quality: Jest, Unit & Integration Testing, Test-Driven Development, Code Review

Observability: Apache SkyWalking, Sentry, Metabase

AI-Assisted Development: Claude Code, AWS Kiro, MCP (Model Context Protocol), GitHub Copilot

Leadership: Team Leadership (3 Engineers), Technical Mentoring, Agile/Scrum, SDLC

PROFESSIONAL EXPERIENCE

Senior Software Engineer **Oct 2022 – Present**

Zuno General Insurance | Mumbai, India

- Architected scalable backend microservices in Node.js and Express.js with dependency-injection and modular design patterns to support high-traffic insurance applications.
- Designed and built a 4-stage Aadhaar data-masking pipeline (Ingestion → Replication → Masking → Upload) processing ~172,000 records with Triple DES encryption and checkpoint-based recovery, delivering compliance-grade PII protection.
- Led the Phoenix migration, moving core policy-data services from MSSQL to PostgreSQL, including custom field-mapping logic, with zero data loss.
- Designed and implemented Redis caching strategies, cutting database load by 40% and improving API response times by 45%.
- Built a Jest-based testing strategy achieving 85%+ code coverage, contributing to a 40% reduction in post-deployment defects.
- Automated CI/CD pipelines using Git, Jenkins, and AWS services, reducing deployment time by 60%.
- Integrated Apache SkyWalking and Sentry for proactive monitoring, reducing production downtime by 35%.
- Led a cross-functional team of 3 engineers, running code reviews and technical mentoring to maintain engineering standards.

Technical Lead **Sep 2022 – Oct 2022**

LearningMate | Mumbai, India

- Led backend architecture design and implementation in Node.js and Express.js, establishing coding standards and best practices.
- Optimized PostgreSQL and MySQL schemas and indexing strategies, cutting query execution time by 30%.
- Guided ReactJS frontend integration and mentored junior developers on Node.js best practices and debugging.

Software Engineer **Jul 2021 – Aug 2022**
Mphasis | Mumbai, India

- Developed scalable backend services in Node.js, Express.js, and TypeScript, implementing RESTful APIs for enterprise applications.
- Provided UAT and production support, using advanced debugging techniques to reduce system downtime by 20%.
- Collaborated with frontend teams on Angular and ReactJS integration, ensuring smooth API integration and optimal performance.

Software Engineer **Mar 2021 – Jun 2021**
Brainvire Infotech Pvt. Ltd | Mumbai, India

- Developed backend services in Node.js and Express.js, implementing business logic and database integration for client projects.
- Supported Agile sprint deliveries through close collaboration and timely defect resolution.

Software Engineer **Mar 2018 – Mar 2021**
TantraSoft Solutions (India) Pvt. Ltd | India

- Managed end-to-end development of full-stack applications using Node.js, Express.js, ReactJS, HTML5, CSS3, MongoDB, and MySQL.
- Designed backend APIs, ReactJS frontend components, and database schemas ensuring seamless integration and performance.
- Developed custom reports and dashboards with data visualization, supporting client decision-making.

Software Developer **Dec 2017 – Mar 2018**
Trackon Courier | India

- Developed and maintained software applications for courier management operations.

Trainee VBA Developer **May 2016 – Dec 2017**
Greysoft Solutions Pvt. Ltd | India

- Designed user interfaces and conducted code reviews applying best practices in VB.NET, VB6, and MSSQL.
- Wrote complex SQL queries for data retrieval and manipulation, ensuring optimal database performance.

EDUCATION

Bachelor of Science in Information Technology (B.Sc IT) **2015**
M.L. Dahanukar College, Mumbai
